

# Neurology

## Consultation and Referral Information

Our team provides health care services for acute and chronic disorders of the central and peripheral nervous systems and neuromuscular system for patients from birth through 18 years of age. Routine EEG testing, such as prolonged video monitoring and ambulatory testing, are some of the services we offer, as well as EMG and Nerve Conduction tests. Additionally, our team is able to assess neurological impact, acquired neurological deficit(s), and learning disabilities that may be secondary to a medical condition.
